VsCode Setup

Tema:
- **Escuro+** (Tema é questão de gosto. Gosto dos comentários em verde claro =))
- **Temas indicados:** Oceanic Next, One Monokai Theme, Monokai Pro, Qualquer tema escuro (Tema claro é de noob)

Extensões:
- **Prettier** to automatically format code
- **ESLint** to automatically find errors in code
- **TODO Highlight** to highlight annotations in code.
- **Image previews** for previews on image hover and in the gutter.
- **TabNine** to autocomplete everything, code and text.
- **Path Intellisense** to autocomplete filenames.
- **Bracket Pair Colorizer 2** to make it easy to find matching brackets
- **Settings sync** to synchronize all your settings between computers.
- **Project Manager** to easily switch between projects. One of the most useful extensions.
- **Material Icon Theme** para mudar icones dos arquivos
